SUMMARY

Frontend Engineer with 3+ years of professional experience designing, building, and maintaining high-performance web and mobile user interfaces. Specialized in React, TypeScript, and React Native, with a proven track record of delivering production-grade applications to Apple App Store and Google Play. Skilled in constructing reusable UI design systems and exploring modern micro-frontend architectures (Single-Spa, SystemJS) to scale platform experiences. Proven success integrating AI-powered workflows (Claude, Cursor) to speed up delivery cycles by 30% while writing secure, modular, and testable code.

WORK EXPERIENCE

HDWEBSOFT Software Development Company

Mar 2025 - Present

Frontend Engineer (Mobile/Web)

- Designed and built high-quality, scalable user interfaces for the Game Publishing Platform, streamlining player authentication, content management, and publishing workflows.
- Delivered high-performance and maintainable frontend applications using React, TypeScript, and React Native, successfully managing the full App Store & Google Play release lifecycle.
- Developed and maintained the company's internal UI System Library, utilizing Tailwind CSS, Shadcn UI, and Headless UI to ensure design consistency and component reusability.
- Collaborated with backend engineers to integrate APIs and design secure, end-to-end features, optimizing state management with Redux-Saga and RESTful endpoints.
- Integrated micro-frontend architectures (Single-Spa, SystemJS) to modularize codebase components, significantly improving platform load speed, scalability, and code maintainability.
- Leveraged AI-powered tools (Claude, Cursor) to automate development workflows and accelerate the project delivery lifecycle by 30%.
- Wrote robust unit tests using Jest and React Native Testing Library, participated in rigorous code reviews, and managed service reliability and troubleshooting operations.

Wareflex

Jul 2024 - Feb 2025

React Native & Web Developer

- Engineered and optimized the web-based Warehouse Management System (WMS) portal and mobile application using React, Next.js, and React Native.
- Built custom UI component libraries with Tailwind CSS and Headless UI to accelerate development speed and maintain design system standards.
- Integrated RESTful APIs and implemented local state caching with Zustand and use-query, establishing secure cookie-based session authentication and XSS protections.
- Improved web performance metrics and Core Web Vitals (reducing page load latency by 25%) by leveraging Webpack/Vite code-splitting and asset optimization.

Assure Global Group

Sep 2023 - Dec 2023

Front End Developer Intern

- Analyzed complex CRM architectures and implemented responsive user layouts and interface features utilizing React, JavaScript, and semantic HTML5/CSS3.
- Collaborated with cross-functional teams using Git, wrote unit tests for frontend components, and participated in engineering process improvements.

PROJECTS

OCR for Vietnamese Handwriting | AI Engineer

Dec 2025 - Mar 2026

- Built a responsive React and Tailwind CSS web application interface to digitize handwriting.
- Architected a scalable backend system using Domain-Driven Design (DDD) principles and deployed PaddleOCR model as a RESTful API using FastAPI.
- Utilized OpenCV preprocessing algorithms (noise reduction, contrast stretching) to improve text recognition accuracy.

Warehouse Management System (WMS) Mobile App | Lead Mobile Developer

Jul 2024 - Feb 2025

- Engineered a full-featured WMS mobile app in React Native and web portal in Next.js from scratch.
- Integrated local offline caching with Zustand, boosting warehouse stock scanning speeds and reducing manual errors.

- Coordinated full deployment and submission lifecycle onto Apple App Store and Google Play.

BMAD Lite Integration with Claude AI | AI / Mobile Developer

2025

- Customized the BMAD Lite framework and hooked up Claude AI APIs to build context-aware workflows.
- Spearheaded AI-powered code generation pipelines to automate component template generation, shortening project delivery by 30%.

EDUCATION

FPT School of Business & Technology

Sep 2025 - Current

Master's degree, Artificial Intelligence

3.62 / 4.0

FPT University

Sep 2020 - Dec 2024

Bachelor's degree, Computer Software Engineering

3.2 / 4.0
